

MADE LOCALLY. MADE TO LAST.

Alpha Awnings Series

The ultimate external
shading solution.

- unique design
- innovative
- modern

built for the
Australian climate

Australian engineered
and design

contemporary
and versatile

The Alpha Awning Range, made locally by Watson's is Australian designed and developed and is perfectly suited to the latest architectural trends. It has been developed specifically for the Australian climate and is built to last.

Innovative in design and of premium quality, the awnings are available in a range of styles

that compliment any alfresco entertaining area, bringing the outdoors inside.

Each of the Alpha awnings are capable of widths up to five metres, making it one of the most versatile awning systems on the market.

Operating options include internal cord winch, spring, crank and motorisation.
