

SOFTSHADES

COLLECTION

*Stylish, Versatile &
Energy Efficient.*

The Vertilux Softshades Collection combines style, versatility and functionality to offer an innovative and energy efficient window covering solution to suit your home.

A variety of operating systems and design options provide the ultimate in light and privacy control whilst slim line hardware minimises light gaps and maximises views.

Made from anti-static nonwoven polyester that aids in the resistance of dust, our Cellular Fabrics are easy to clean and are available in a range of colours, cell sizes and opacities.

Hardware: CordLess, Dual Operation.
Fabric: Daybreak, Butter Cream, 20mm Translucent

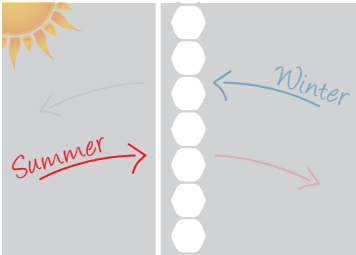

Unparalleled in terms of versatility and design, Vertilux's Softshades truly are a world class, sophisticated window covering solution.

CELLULAR SHADES OFFER

SUPERIOR ENERGY EFFICIENCY

Want to save up to 32%* on your heating costs?

Vertilux Softshades Collection have been designed with a unique honeycomb cell shape that creates pockets of energy-saving insulation. The cell construction traps air and makes it more difficult for heat energy to transfer in and out of the window, improving energy efficiency and reducing your heating and cooling costs in both Winter and Summer.

R-value is a measure of a product's ability to resist heat flow, which is especially important in the cool winter months, when a significant amount of a home's heat is lost through the windows. The higher the R-value, the more insulation a product provides and the better it is at reducing heat loss.

PRODUCT	R-VALUES**
10mm Daybreak Translucent	0.31
20mm Sabelle, Daybreak & Sunterra Translucent	0.33
10mm Dusk Blockout	0.45
20mm Sabelle, Dusk & Sunterra Blockout	0.53
35 Insulated Roof Panel	1.05
65mm Pink Batt	1.50

**The R-Values are the combined measurement of 3mm (one-eighth inch) Cl glass (R=0.127) plus window covering and are reported in metric SI units. Thermal properties are determined by a certified third party laboratory utilising accepted ASTM, NFRC and WES standards and procedures. Measurement may vary based on window type and method of installation.

*Savings are based on the installation of fully-recessed, reveal-mounted 20mm single cell blackout fabric in an average home in Sydney, compared with the House Energy Rating standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on window type and installation.

A close-up photograph of window shades with a honeycomb-like structure. The shades are in a partially open position, revealing a central air pocket. The air pocket is highlighted with a white circular arrow diagram and the text "Air pocket traps heat." The shades are a mix of light grey and blue colors.

Air pocket
traps heat.

Vertilux's Softshades Collection offers you the ability to reduce heat through your windows in both winter and summer.

THE ULTIMATE CHILD-SAFE SOLUTION

Vertilux Softshades are the ultimate in child-safe window coverings offering innovative operating systems to enhance the safety of children and pets.

Child-safe window coverings are one of the most important considerations when choosing a window covering solution. Cords used to open and close blinds present a hazard to young children and need to be secured at all times out of reach from little hands.

The Vertilux Softshades Collection have cordless operating options which present the ultimate child-safe solution for your home and loved ones:

CordLess

Cordless lifting system where the cellular shade raises and lowers by moving the rail either up or down.

Motorised

Effortless operation at the press of a button where the bottom of the blind is either raised or lowered with a remote control.

Hardware: CordLess, Bottom-Up.
Fabric: Daybreak, Butter Cream, 20mm Translucent

Hardware: Lift n Lock, Bottom-Up.
Fabric: Sabelle, Silver Birch, 10mm Translucent

IMPROVED INDOOR AIR QUALITY

For a fresh and healthy home, Vertilux Cellular Fabrics have safe levels of Volatile Organic Compounds (VOCs). It meets the criteria set by the Green Building Council of Australia and is a smart choice for ensuring **optimal air quality**.

Whites, naturals, beiges, pastels and greys make the fabric range diverse and ready to complement any home decor.

LARGER SPANS

Larger windows usually require more than one blind to be linked together. Vertilux Softshades are one of the only true window covering **solutions for large windows**, handling **widths of just over 4m wide** with one single blind.

SMALLER LIGHT GAPS

The headrail has been cleverly designed to ensure **minimal light gaps**. The slimline hardware and cellular construction also allows for **compact stacking** once the shade is raised, ensuring outside **views are maximised**.

SOUND ABSORPTION

Perfect solution to **absorb sound** to quieten the home environment keeping exterior noise out.

Translucent

Blockout

FABRIC
OPTIONS THAT
CONTROL LIGHT
& PRIVACY
WITH EASE

Made from **anti-static durable, polyester** that aids in the **resistance of dust** makes them **easy to clean** and they are available in a range of colours, cell sizes and opacities.

20mm

OPACITY CHOICES

Blockout

Blockout fabrics offer the ultimate in privacy, both day and night. Open to allow sunlight in, close to enjoy total darkness.

Translucent

Translucent fabrics offer complete day time privacy while still allowing natural light to filter into the room.

Sheer

Sheer fabrics provide great day time visibility so you can still enjoy the outside view whilst diffusing the harsh outside light.

CELL SIZE OPTIONS

20mm Cell Size

The larger cell size can be used for all types of windows - large, small, wide and narrow. The 20mm cell size looks particularly elegant over large window spaces.

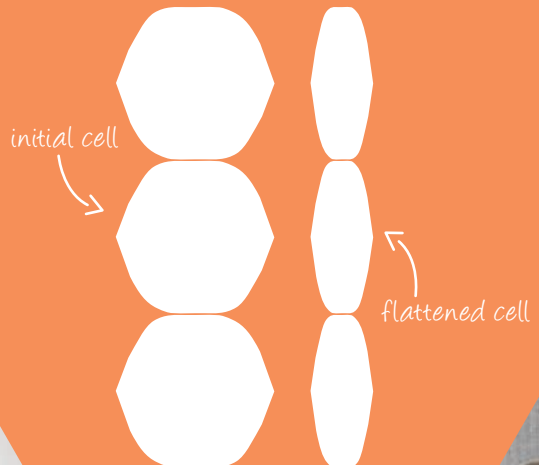

10mm Cell Size

The smaller cell size is typically great for small windows with the pleats looking proportionate to the window size making a defined classic style on a smaller scale.

NON D-CELL

Replica cellular fabrics without D-Cell look round initially, but over time they flatten out and the crisp pleat becomes flat.

D-CELL

With 20mm Softshades, you are assured your pleats will stay crisp over time.

Ideal for windows on sloping walls or hard-to-reach windows.

CARE & CLEANING

Vertilux Softshades are easy to clean and are designed to be dust resistant.

General Care (GC)

Dust with a feather duster, compressed air or a hair dryer set on cool.

Vacuum (VC)

Gently vacuum with a brush attachment.

Spot Clean (SC)

Using warm water and mild detergent, dampen a clean white cloth and gently dab the spot on the fabric only.

Note: Rubbing can damage fabrics. Do not spot clean the valance.

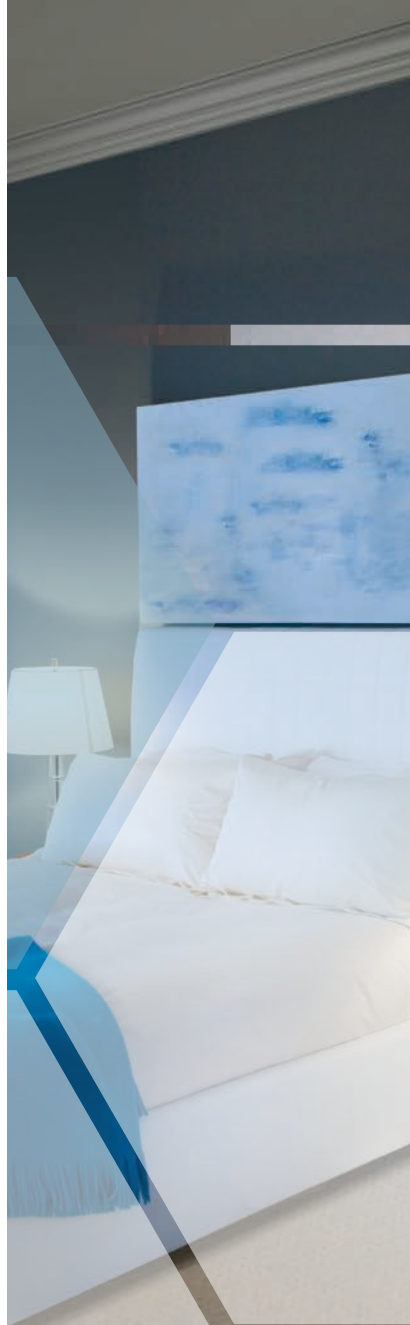

UltraSonic (US)

Professional ultrasonic cleaning services are an effective means of cleaning translucent fabrics only.

Bathtub (BT)

1. Fill a tub with warm water and mild detergent.
2. Open the shade and immerse the fabric of the shade into the water, do not submerge the headrail.
3. Rinse with clean water.
4. Fully close the shade and tilt it to allow excess water to drain off.
5. Reinstall the damp shade, lower it and let it dry completely.
